HOW DOES "CURENEX" WORK?

5 KEY INGREDIENTS OF CURENEX

MULTI-NOURISHING SOLUTION
For healthy, glowing, youthful looking skin

CURENEX

- PDRN (SALMON DNA)
- 15 Multi Peptides
- Collagen
- Hyaluronic Acid
- Glutathione

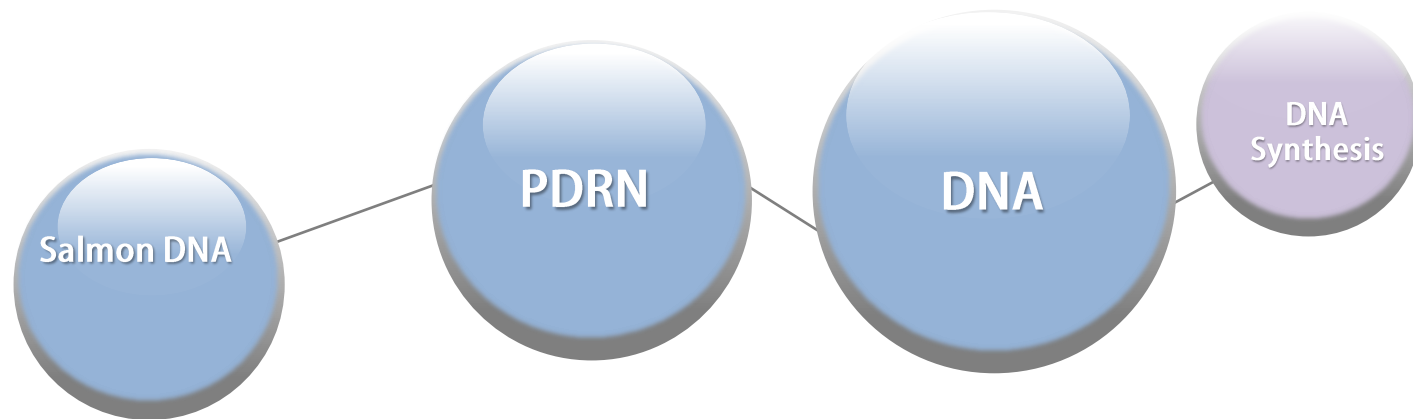

KEY INGREDIENT OF CURENEX, 1. PDRN : Polydeoxyribonucleotide

CureNex main ingredients, Polydeoxyribonucleotide (PDRN)

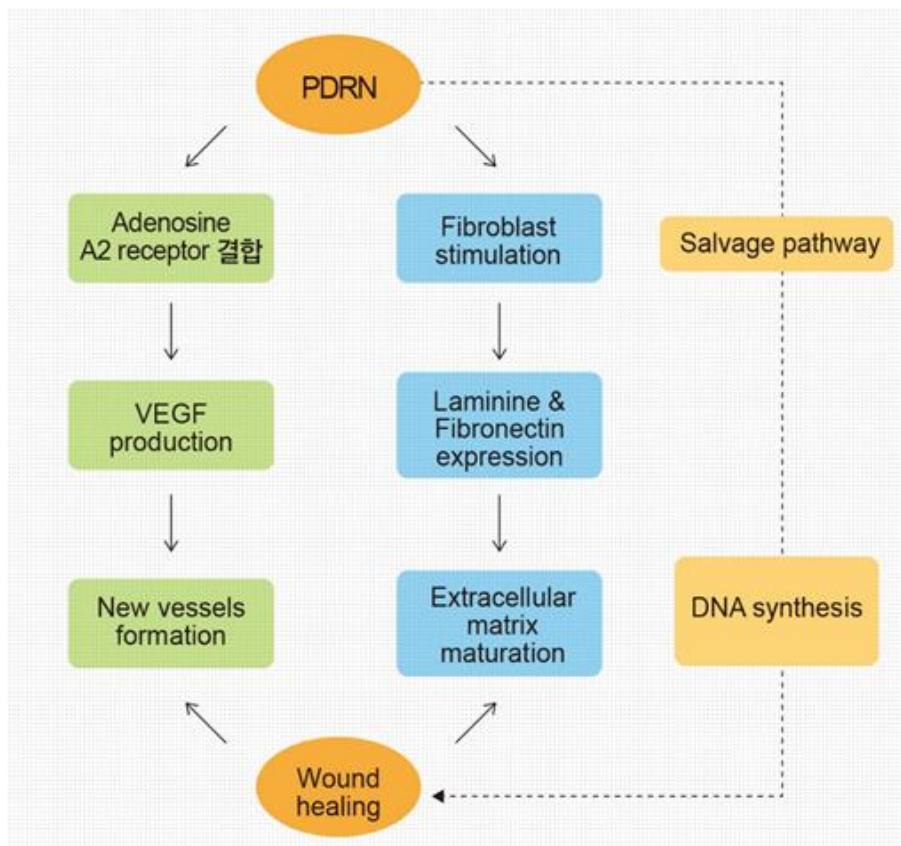

PDRN aids cell viability, extracellular matrix formation(ECM), Angiogenesis and other medical applications.

Its initial use case is the treatment and repair of damaged tissue, but it has been developed to use for skin rejuvenation.

PDRN regenerates tissue by activating micro vessels and activates fibroblasts to help produce collagen.

KEY INGREDIENT OF CURENEX, 1. PDRN : Polydeoxyribonucleotide

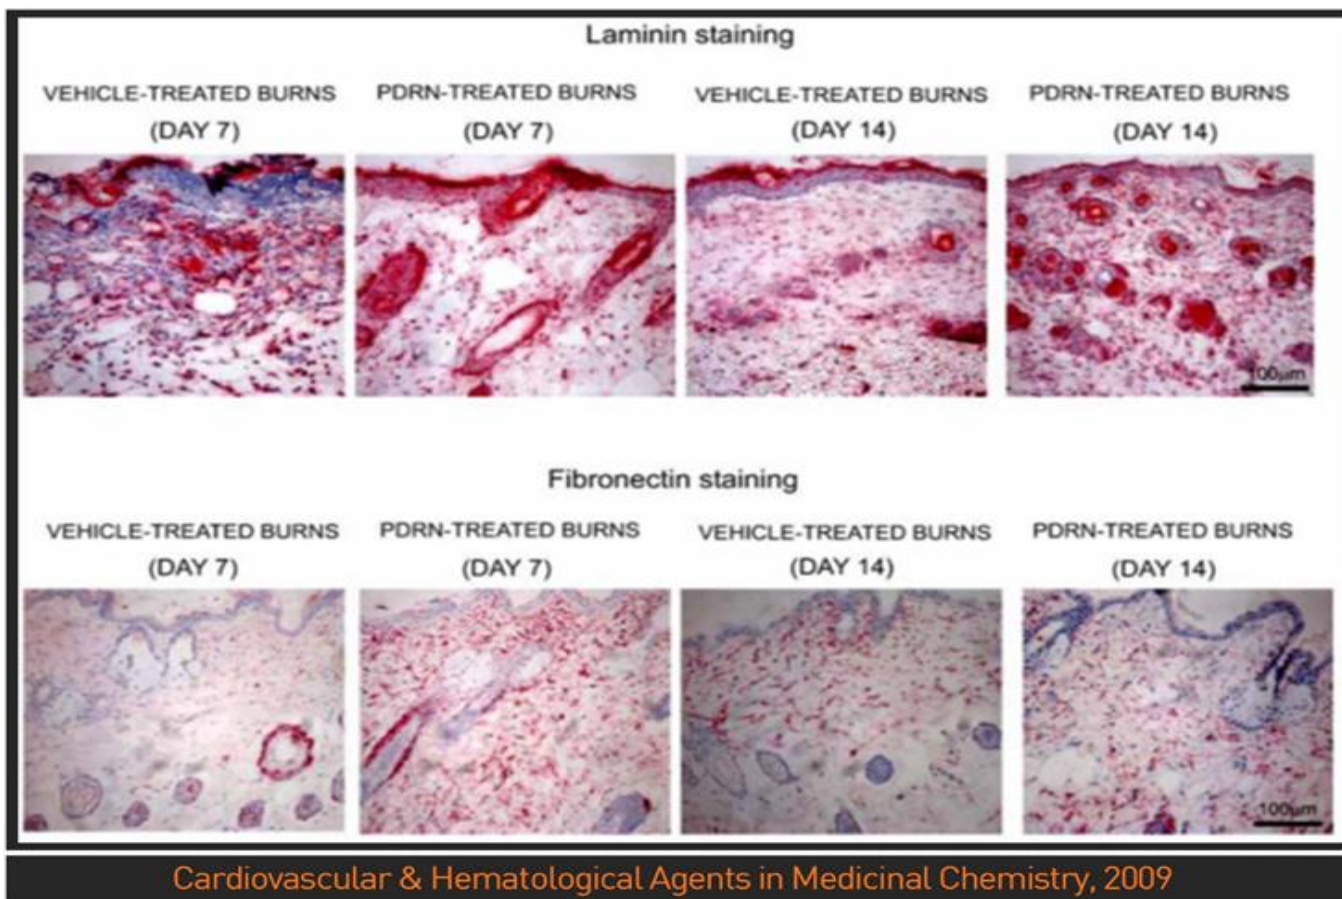

■ PDRN DNA Synthesis

- ✓ Very small amount in a new tissue.
- ✓ Developed as a medicine for an initial burn and a wound.
- ✓ By facilitating the cell regeneration from the DNA stage, interaction with fibroblast and rejuvenation of the damaged skin via biosynthesis of collagen.
- ✓ Increased tissue regeneration ratio when used in combination with skin graft and fat graft.
- ✓ Fast and excellent cell regeneration and skin rejuvenation effects.
- ✓ Recovery of the natural and resilient skin.
- ✓ Improvement of a swollen face.
- ✓ KFDA-approved stable skin treatment.
- ✓ Painless with no stimulation.

■ PDRN injection :

Burn Wound healing effect Formation of New vessels and tissue regeneration

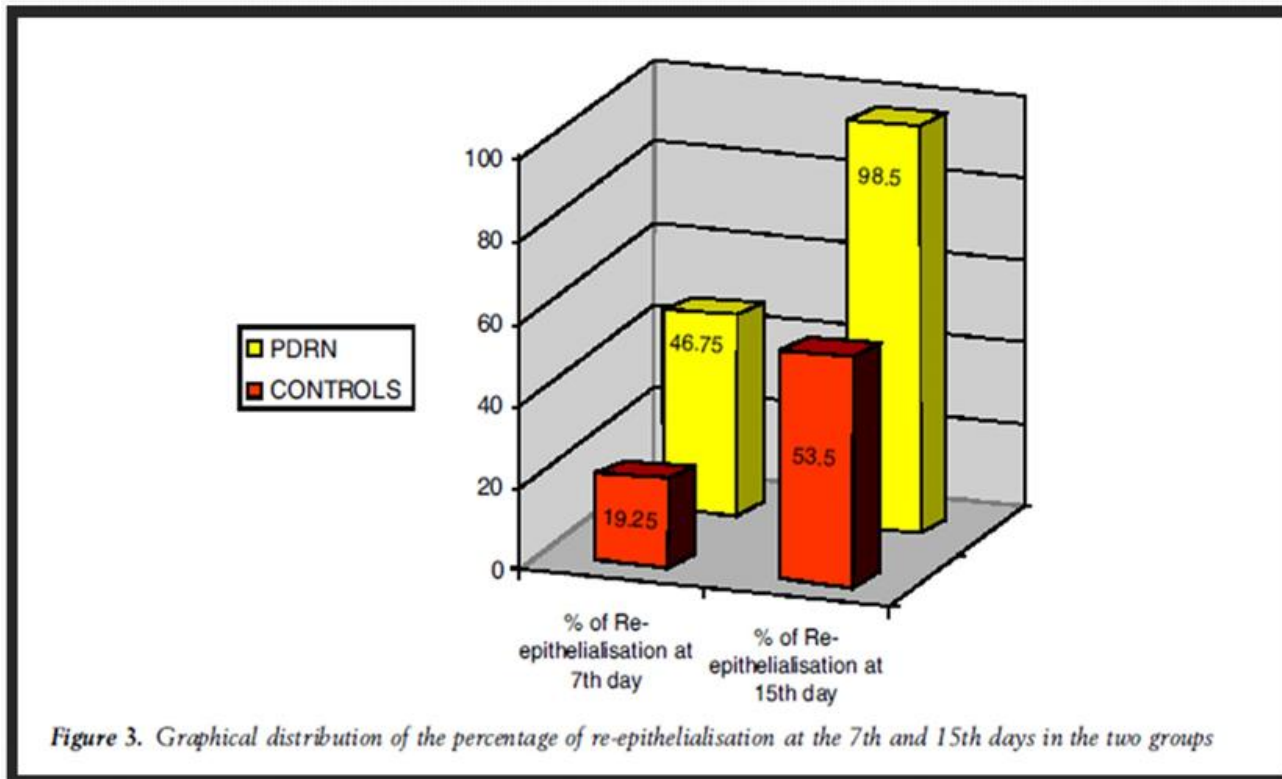

■ PDRN _ Wound Healing result

Current Medical Research and Opinion 2001

KEY INGREDIENT OF CURENEX, 2. 15 MULTI PEPTIDES

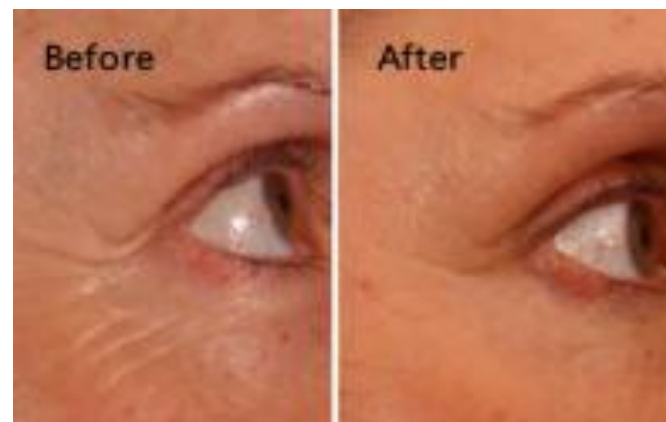

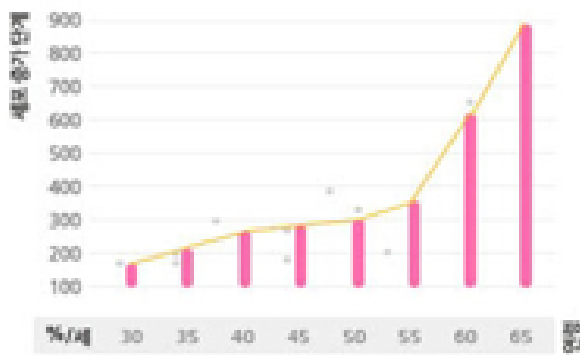

KEY INGREDIENT OF CURENEX, 2. 15MULTI PEPTIDES

polypeptides has various types with various functions and it is involved in the intercellular communication. In addition, they are essential for cell proliferation, growth and development of organisms, and they are involved in the epidermis and dermis.

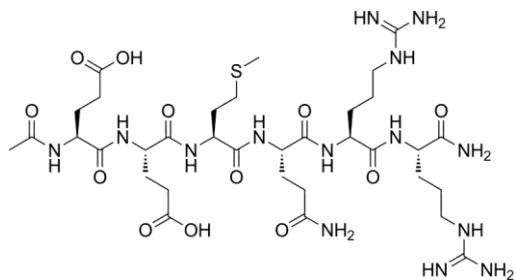

* Growth Factors(Polypeptides) are involved in cell differentiation and are essential to normal cell cycle, and are thus vital elements in the life of animals from conception to death. Growth Factors mediate fetal development, play a role in maintenance and repair of tissues, stimulate production of blood cells.

After EGF was used for 60 days,

KEY INGREDIENT OF CURENEX, 2. 15MULTI PEPTIDES

■ Acetyl Hexapeptide-8

Acetyl Hexapeptide-8 (or-3)
Argireline

Commonly referred to as “Botox in a jar” because it’s believed to inhibit the release of neurotransmitters and relax the facial muscles- thus reducing expression lines and wrinkles. A study published in the International Journal of Cosmetic Science did show a 10% concentration of Argireline to reduce wrinkles by 30% over a 30-day period.

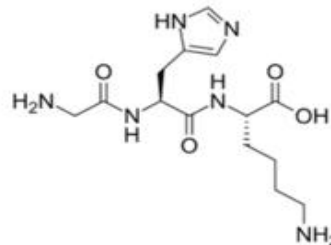

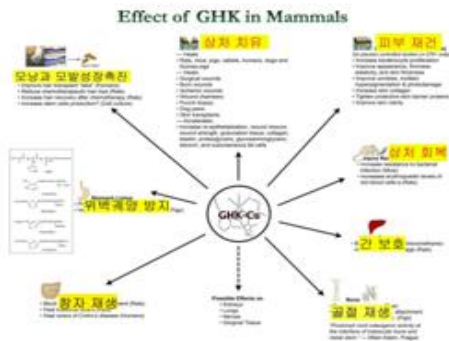

Promote lifting effect and increase elasticity

KEY INGREDIENT OF CURENEX, 2. 15MULTI PEPTIDES

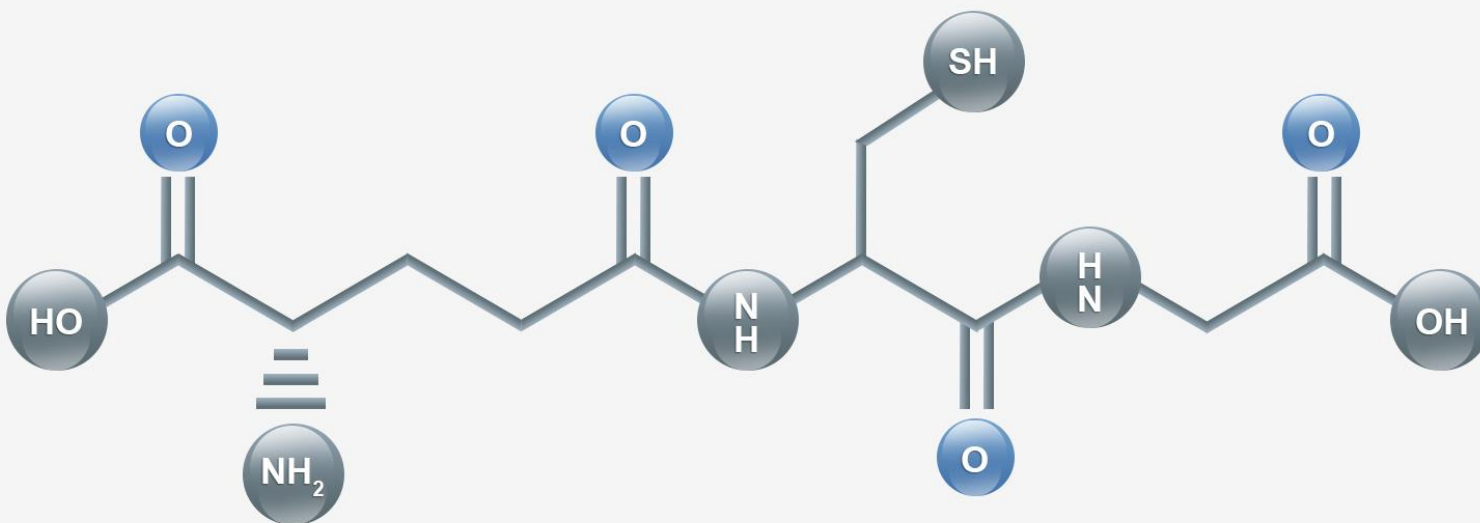

■ Copper Tripeptide-1

Rejuvenating Copper peptide is perfect for aging or mature complexions. Copper is a natural peptide that renews the skin's look. Copper helps dead skin cells turn over faster giving way to new, rejuvenated, youthful skin. A naturally occurring peptide, copper gives your skin's vitality a boost. It is a micro-nutrient that improves your skin's appearance, diminishes the appearance of wrinkles and tightens.

*these peptides were investigated for their benefit in wound healing from burn scars.
Patented ingredient in **skin and hair regeneration***

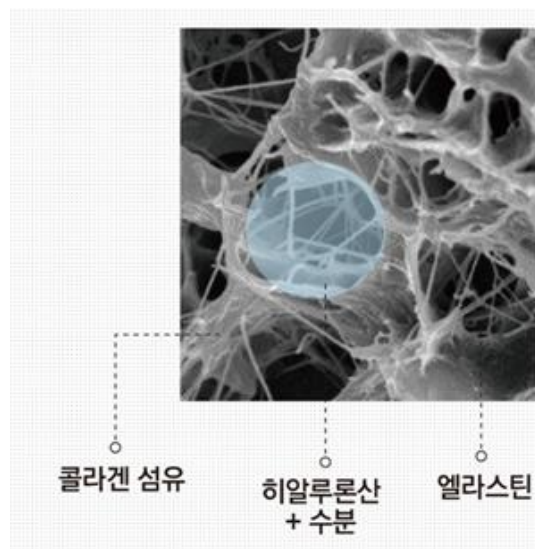

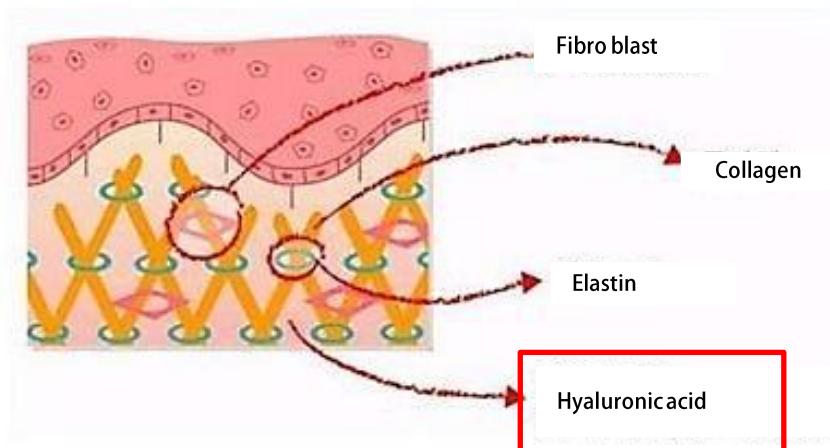

KEY INGREDIENT OF CURENEX, 3. GLUTATHIONE

GLUTATHIONE : SKIN WHITENING

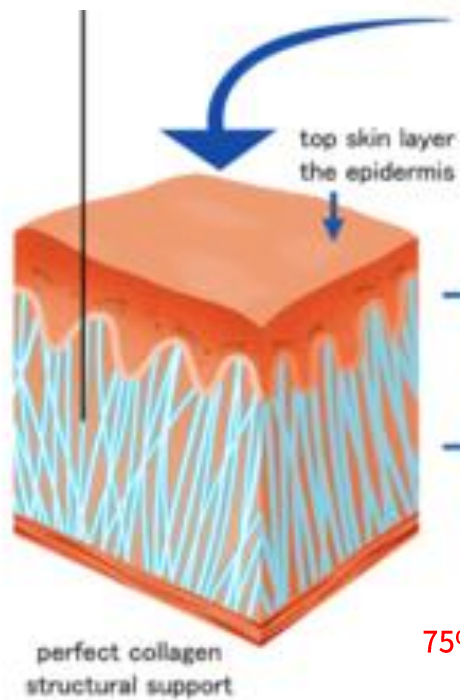

KEY INGREDIENT OF CURENEX, 4. HYALURONIC ACID

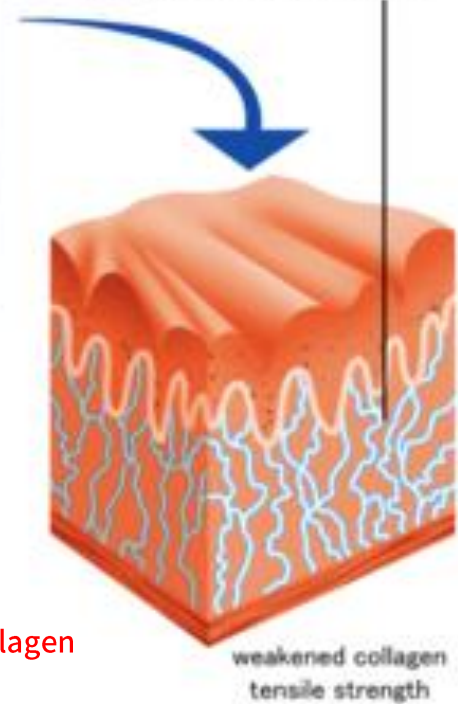

피부의 탄력성을 결정짓는 진피층

KEY INGREDIENT OF CURENEX, 5. COLLAGEN

Optimal collagen production leads to healthy plump youthful skin.

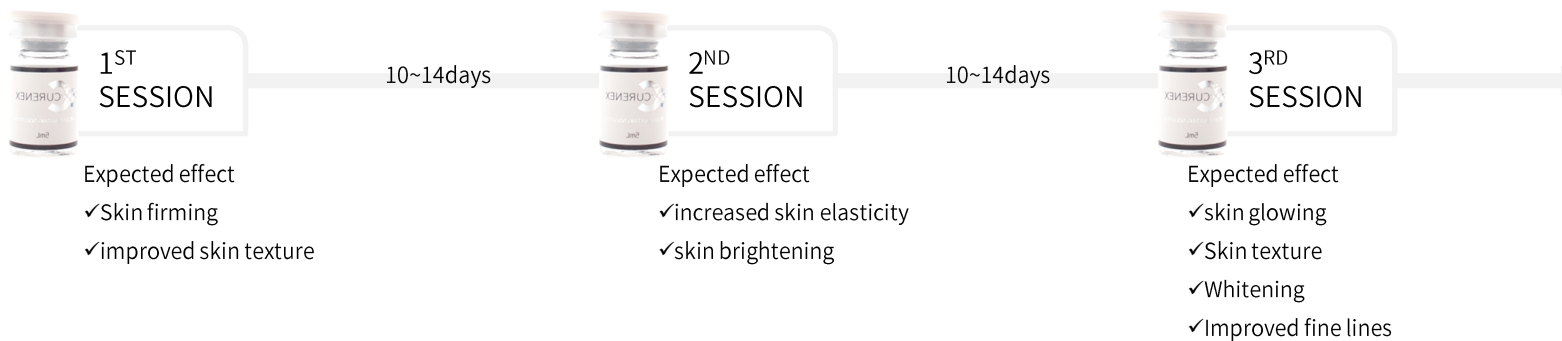

Low production of collagen leads to skin sagging and wrinkles.

75% of dermis(weight) is made of collagen

PROTOCOL (CureNex only)

Beginning sessions

Maintaining sessions

PROTOCOL (with CureNex line)

Beginning sessions
